Place of Birth: Pt. Pleasant, New Jersey, USA

Citizenship: USA Citizenship/Swiss Visa in process

EDUCATION

05/2010 – 01/2013	Hunter College of the City Of New York	New York, NY
	<i>Master of Science, Adult/Geriatric Nurse Practitioner Major</i>	
	▪ Sigma Theta Tau International Nursing Society	
09/2005 – 01/2009	Adelphi University	Garden City, NY
	<i>Bachelor of Science, Nursing Major</i>	
	▪ Sigma Theta Tau International Nursing Society	
05/2000 – 05/2002	Ocean County College	Toms River, NJ
	<i>Associate of Science, Nursing Major</i>	

NURSE PRACTITIONER EXPERIENCE

	Rowe Plastic Surgery	
3/18/24 – 11/27/24		Palm Beach, FL
	<i>Nurse Practitioner</i>	
	○ Pre-operative preparation and medical clearance review for the following surgeries: ○ Bilateral breast reduction, breast augmentation, post mastectomy breast augmentation, face lift, rhinoplasty, blepharoplasty, liposuction, ○ Post-operative tele health care ○ On call 1 week per month for emergency patient phone calls ○ Non-surgical cosmetic consultations to develop an appropriate treatment plan ○ Procedures including but not limited to: ○ Neuromodulators (Daxxify & Xeomin), HA fillers (Restylane Kysse & RHA collection), Chemical peels (VI Peels), PRP & Rejuran microneedling, and JetPeel facial ○ Patient education pre and post cosmetic procedure ○ On-going self education to keep up to date on evidence based practices ○ Helped to set up new office in Palm Beach, ensuring we met all Department of Health inspection regulations	
	DynamiQ Skincare	
12/26/2023 – 3/17/24		West Palm Beach, FL
	<i>Aesthetic Nurse Practitioner (Part-Time, Contract)</i>	
	○ Non-Surgical cosmetic procedures including: ○ Platelet-Rich Fibrin for hair restoration and microneedling, Fractional Laser, Microneedling, Neuromodulator Botox ○ Review of Patient's past medical history, and skincare routine ○ Identify clients Fitzgerald skin type to help guide best treatment ○ Patient education pre and post care	

Flatiron Health

10/16/2022 – 4/15/24

Remote

Oncology Abstractor (Part-Time)

- Abstract data from electronic medical records using the proprietary software system to enter data into a database to help generate robust data sets
- Abstraction tests for credentials in a variety of modules (currently abstracting NSCLC and SCLC data points, interpreting and collecting biomarker data points and Breast Cancer Real-World Data)
- Maintaining a high level of performance, measured by passing evaluations and quality and efficiency scores
- Read, understand, and abstract data from real world biomarker pathology reports
- Provide feedback and input on new features, tools, and workflows
- Help with feasibility and initial testing of novel data points or new abstraction approaches

Columbia University Medical Center

04/05/2019 – 07/28/2019

New York, NY

Oncology Nurse Practitioner, pilot Urgent Care for Oncology Patients

- Nurse Practitioner led Urgent Care
- Patients with acute, non-life threatening complaints
- Completed focused history and physical
- Ordered scans, tests, and blood work
- Interpreted, evaluated findings of studies/tests, and diagnosed
- Prescribed medications, IV fluids etc. based on diagnosis
- Referred patients to specialty clinics as needed
- Early data showed a decrease in ER visits, wait times for evaluation and management, and increased patient satisfaction. Supporting the need for an oncology urgent care.

Columbia University Medical Center

01/22/2017 – 03/08/2019

New York, NY

Research Nurse Practitioner/Core Leader

09/10/18 – 03/08/19 Immunotherapy & Thoracic Oncology Research with key opinion leader Dr. Naiyer Rizvi and I served on the consulting and advisory board for AstraZeneca (Imfinzi).

01/23/18 – 09/10/18 Phase I Clinical Trials with key opinion leader Dr. Richard Carvajal

Responsibilities included but were not limited to:

- Collaborated with the principle investigators
- Served as a Co-Investigator
- Oversaw and implemented 22 active national and international, multicenter phase I, II, and III clinical trials throughout my time at the cancer center
- Worked closely with research study assistants/CRA, project managers, data managers, and nursing staff
- Determined eligibility of patients for entry into a clinical trial based on findings and follow through with screening patients for those protocols
- Provided education for patients considering enrollment or those already enrolled on a clinical trial
- Reviewed protocols with patients and obtained informed consent
- Assessed clinical responses including physical and psychosocial status of patients by means of interview, health history, physical examination, and diagnostic studies
- Attended and/or performed all protocol required visits either independently or as a shared visit depending on treating physician's preference
- Daily oversight and coordination with research study assistants/CRA
- Proactively addressed clinical deficiencies that would impede on protocol adherence
- Ensured timely communication to study team
- Knowledge of study budgets
- Submitted billing for standard of care visits

- Initiated referrals to other health care providers, and/or consulted with the attending physician or the collaborating physician
- Educated the nursing staff on new protocols that our institution was accruing patients to and ensured education of protocol amendments
- Provided follow-up with patients to ensure that study procedures were being followed and adherence was maximized
- Medication management per protocol
- Wrote prescriptions for medication, routine diagnostic and follow-up studies, and therapeutic measures per standard of care and per protocol guidelines
- Identified, monitored, and managed study drug toxicities
- Interpreted and evaluated findings of studies/tests
- Assessed and documented adverse events using CTCAE guidelines
- Filed and reported serious adverse event in a timely manner
- Performed phone triage for acute clinical issues and conducted phone assessments as required per protocol
- Provided guidance and leadership to all members of the disease team
- Served as a clinical resource to other nurses and nurse practitioners
- Immunotherapy project I implemented based on the need for IO related toxicities
 - Allocated clinic time for patients referred to me for IO toxicities
 - Identified and managed patients with an immunotherapy related toxicities
 - Was in the development phase of developing an app based assessment tool for patients on immunotherapy to report symptoms in real time
 - Developed a database for research and study purposes
 - Collaborated with physicians at other hospital sites
 - Served as a resource for providers prescribing immunotherapy
 - Collaborated with MSK Dermatology team to present an abstract for the 2018 ASCO meeting “Treatment outcomes of cutaneous adverse events to immune checkpoint inhibitors” which later lead to a publication in the Journal of Clinical Oncology.

02/2017 – 03/2018

DRIVER XYZ

New York, NY/San Francisco, CA

Research Nurse Practitioner Consultant (part-time)

- A first-in-kind technology platform that connected cancer patients to treatments and knowledge, all over the world with access to clinical trials at leading academic centers
- Was a key player to help build a product platform in the early stages e.g. data extraction from protocols and patients charts

04/2016-07/2016

Humboldt Medical Specialist/St. Joseph’s Hospital

Eureka, CA

Clinical Practice Nurse/Travel Position (while waiting for NP credentialing)

- General Oncology
 - Nurse-Physician collaborative based ambulatory care
 - Provided continuity of care throughout various stages of treatment and follow up
 - Assessed and managed patients in collaboration with 4 physicians
 - Provided ongoing patient education
 - Collaborated with case managers and social workers
 - Triage phone calls and managed adverse events from chemotherapy, biotherapy, and immunotherapy

09/2013 – 10/2015

Memorial Sloan Kettering Cancer Center

New York, NY

Research Nurse Practitioner

- Melanoma and Immunotherapeutic Department (with key opinion leaders Dr. Jedd Wolchok as Chief of Melanoma Service and Dr. Michael Postow)
Responsibilities included but were not limited to:

- Collaborated with the principle investigators of all melanoma clinical trials
- Oversaw and implemented 36 national and international, multicenter phase I, II, III and IV clinical trials throughout my time at the cancer center
- Worked closely with research study assistants/CRA, project managers, data managers, and nursing staff
- Assessed clinical responses that included physical and psychosocial status of patients by means of interview, health history, physical examination, and diagnostic studies
- Daily oversight and coordination with research study assistants/CRA
- Attended and/or performed all protocol required visits either independently or as a shared visit depending on treating physician's preference
- Proactively addressed clinical deficiencies that would impede on protocol adherence
- Ensured timely communication to study team
- Knowledge of study budgets
- Submitted billing for standard of care visits
- Initiated referrals to other health care providers, and/or consult with the attending physician or the collaborating physician
- Assisted in the institutional review process/IRB
- Reviewed and edited protocols and consent forms prior to initiating enrollment
- Determined eligibility of patients for entry into a clinical trial based on findings and followed through with screening patients for those protocols
- Reviewed protocols with patients that participated in the informed consent process
- Provided education for patients that considered enrollment or those already enrolled on a clinical trial
- Contacted medical monitors with any questions during the patient treatment phase
- Educated the nursing staff on new protocols that our institution was accruing patients to
- Provided follow-up with patients to ensure that study procedures are being followed and adherence was maximized
- Medication management per protocol
- Wrote prescriptions for medication, routine diagnostic and follow-up studies, and therapeutic measures per protocol guidelines
- Identified, monitored, and managed toxicities
- Interpreted and evaluated findings of studies/tests
- Assessed and documented adverse events using CTCAE guidelines
- Filed serious adverse event reports in a timely manner
- Performed phone triage for acute clinical issues and conducted phone assessments as required per protocol
- Provided guidance and leadership to ensure all members of the disease team followed protocol
- Served as a clinical resource to other nurses and nurse practitioners
- Independently responsible for a select group of patients receiving immunotherapy off protocol during the compassionate use of PD-1 drugs
- Prepared for an FDA audit; we were the largest accruing site in the US and there was a need to expedite FDA drug approval
- Assisted in the development of an EMR assessment for adverse events related to clinical trials using CTCAE guidelines
- Assisted in the development of a research competency training module for MSK nurses

TRAINING/NURSE PRACTITIONER INTERNSHIPS

09/2012 – 12/2012

Memorial Sloan Kettering Cancer Center

New York, NY

Breast Cancer Survivorship Clinic

- Monitored for signs of cancer recurrence
- Identified, prevented, and controlled any long-term and late side effects associated with cancer and its treatment
- Wrote survivorship plans that included scans, blood work and follow-up timeline
- Collaborated with patient's Primary Care Physician

01/2012 – 05/2012 **New York-Presbyterian/Columbia University Medical Center** New York, NY
Primary Care (AIM Clinic), Woman's Health Clinic, Cardiology/Coumadin Clinic

- Demographic mostly Medicare and/or Medicaid coverage
- Provided preventive care; asthma services; routine medical examinations; HIV testing
- Provided nutrition counseling and diabetes management
- Referrals for specialty consultations
- Provided BP management, cholesterol management, and Coumadin management
- Ordered scans, tests, blood work and managed patient medications

09/2011 – 12/2011 **Jacobi Medical Center** New York, NY
Urgent Care Center/Fast Track

- Level I trauma center, 13 room UCC contiguous with the main emergency department managing any patient that presented to the Fast Track area with acute, non-life threatening complaints
- Completed focused history and physical exams
- Ordered scans, tests, and blood work
- Interpreted, evaluated findings of studies/tests, and diagnosed
- Based on diagnosis, prescribed medications and discharged patients with a follow up or admitted patients
- Referred patients for specialty consultations and follow-up plan

NURSING EXPERIENCE

11/2011 - 09/2013 **Memorial Sloan Kettering Cancer Center** New York, NY
Infusion, Clinical Nurse III

- Gastrointestinal and Melanoma Sarcoma/Chemotherapy Unit
 - Provided care for oncology patients on a 23-chair outpatient chemotherapy unit
 - Charge Nurse as assigned
 - Administered chemotherapy, biotherapy, and chemotherapy via hepatic pump and intraperitoneal pump
 - Responsible for knowledge of protocols and administered research treatments per protocol
 - Float to Phase 1 Research Infusion Unit as needed
 - Provided ongoing patient education
 - Participated in the implementation of clinical support programs to ensure optimal care throughout the health-care continuum

11/2007 - 11/2011 **Memorial Sloan Kettering Cancer Center** New York, NY
Clinical Office Practice Nurse III for the Chief Physician of the Surgical Department, Dr. Samuel Singer

- Gastric Mixed Tumor Surgical Service
 - Nurse-Physician collaborative based ambulatory care and included inpatient rounds
 - Assessed and managed sarcoma patients pre and post operatively
 - Provided continuity of care throughout various stages of treatment and follow up
 - Patient and family education provided pre and post operatively
 - Collaborated with case managers and social workers
 - Triage phone calls

09/2007 - 11/2007 **Memorial Sloan Kettering Cancer Center** New York, NY
Clinical Office Practice Nurse III / Travel Nurse

- Rotated with all surgeons in the Gastric Mixed Tumor Surgical Service
 - Nurse-Physician collaborative based ambulatory care
 - Core Nurse to Melanoma, Gastric, Pancreatic and Sarcoma patients pre and post operatively
 - Assessed and managed patients in five surgical practices
 - Provided continuity of care throughout various stages of treatment and follow up
 - Patient and family education provided pre and post operatively
 - Collaborated with case managers and social workers

- Triaged phone calls

09/2006 - 09/2007

Memorial Sloan Kettering Cancer Center

New York, NY

Infusion Clinical Nurse II / Travel Nurse

- Outpatient Gastrointestinal and Melanoma/Sarcoma Chemotherapy Unit
 - Provided care for oncology patients on a 23-chair outpatient chemotherapy unit
 - Administered chemotherapy, biotherapy, and research IV medications per protocol
 - Administered chemotherapy and biotherapy
 - Responsible for knowledge of protocols and administered research treatments per protocol
 - Float to all sub-specialty oncology chemotherapy units

02/2006 - 11/2006

Jersey Shore University Medical Center

Neptune, NJ

Inpatient Nurse

- Per-Diem/Oncology Unit
 - 550 bed trauma level II university teaching hospital
 - Provided care for 6-8 oncology/medical patients on a 36-bed inpatient unit
 - Administered chemotherapy, blood products, and oncological medications
 - Handled PCA/pain management
 - Provided Hospice Care

09/2005 – 11/2006

Atlantic Hematology Oncology

Manasquan, NJ

Infusion, Office Practice Nurse

- Outpatient General Oncology
 - Nurse-Physician collaborative based ambulatory care with 6 Physicians and 2 Nurse Practitioner
 - Assessed and managed general oncology patients
 - Provided continuity of care throughout various stages of treatment and follow up
 - Provided ongoing patient education
 - Provided care for patients on a 12-chair outpatient unit in an office setting
 - Mixed and administered chemotherapy
 - Assisted in bone marrow biopsies
 - Triaged phone calls

01/2004-07/2005

Oncare Hawaii, Inc.

Honolulu, HI

Infusion, Office Practice Nurse

- Outpatient General Oncology
 - Nurse-Physician collaborative based ambulatory care at 4 facilities
 - Assessed and managed general oncology patients
 - Provided continuity of care throughout stages of treatment
 - Provided ongoing patient education
 - Provided care for patients ranging from 4-10 chair outpatient units in an office setting
 - Mixed and administered chemotherapy
 - Functioned as the only nurse in 3 of the 4 facilities
 - Triaged phone calls

05/2004 – 11/2004

St. Francis Medical Center West

Ewa Beach, HI

Inpatient Nurse

- Float to all Floors
 - Provided care for 5-8 patients on a 102-bed hospital as a float nurse which included medical/surgical, post-operative, telemetry, and emergency room
 - Interpreted labs, telemetry strips on assigned patients
 - Patient and family education
 - Assisted in procedures done in the emergency room for acute patients

02/2004 – 05/2004

Kaiser Permanente Oncology Clinic

Denver, CO

Infusion Clinical Nurse

- Outpatient General Oncology
 - Assessed and managed general oncology patients
 - Provided continuity of care throughout stages of treatment
 - Provided ongoing patient education
 - Provided care for patients on a 12-chair outpatient unit
 - Administered chemotherapy and blood products
 - Triaged phone calls
 - Responsible for removal of Hohn Catheters

03/2003 – 12/2003

Jersey Shore University Medical Center

Neptune, NJ

Inpatient Nurse

- Telemetry, Step-Down Unit
 - 550 bed trauma level II university teaching hospital
 - Provided care for 6-8 telemetry patients on a 38-bed inpatient unit
 - Interpreted telemetry strips
 - Care for patients pre-CABG, pre- and post-PTCA/catherization, MI, CHF, and other cardiac conditions that required cardio version, pacing, arrest codes and titration

03/2002 – 01/2004

Atlantic Hematology Oncology

Manasquan, NJ

Infusion Office Practice Nurse

- Outpatient General Oncology
 - Nurse-Physician collaborative based ambulatory care with 4 Physicians and 1 Nurse Practitioner
 - Assessed and managed general oncology patients
 - Provided continuity of care throughout various stages of treatment and follow up
 - Provided ongoing patient education
 - Provided care for patients on a 12-chair outpatient unit in an office setting
 - Mixed and administered chemotherapy
 - Assisted in bone marrow biopsies
 - Triaged phone calls

MAJOR PROJECTS THROUGHOUT CAREER

1/2019 - I was identified by the director of Integrative Medicine at Columbia University as a valuable resource in teaching yoga to cancer patients and asked to sit as a board member in a special interest group concentrating on yoga for cancer patients as a part of the Society of Integrative Oncology (SIO). This special interest group is not only a resource to other yoga instructors and patients but also a portal to create evidence-based curriculum in yoga for cancer patients.

9/2018 - I was identified by Naiyer Rizvi, Director of Thoracic Oncology and Immunotherapeutics at Columbia University, as a highly knowledgeable practitioner in immunotherapy to help spearhead an initiative to close the gap in care and management for patients receiving immunotherapy. This was a grant funded research project to promote collaborations on Immune-Related Adverse Events (irAE) associated with Immunotherapy. I established an irAE database, identified patients with irAE, and managed their care. During this appointment I identified the need and importance to collect real time data on patients with adverse events from immunotherapy and initiated bringing in an app developer to help create an app patients can use to report symptoms in real time for the safety and management of an irAE.

4/2015 - I was identified by my Nurse Manager at Memorial Sloan Kettering Cancer Center as a valuable leader in the area of research and was invited to participate in the development of a research competency-training module for nurses and nurse practitioners. This resulted in the development of a rigorous orientation for new research nurses and research nurse practitioners at Memorial Sloan Kettering Cancer Center.

9/2008 - As a chemotherapy infusion nurse at Memorial Sloan Kettering Cancer Center, I identified a need to change practice to improve quality of care for oncology patients with a port-a-cath receiving chemotherapy and biotherapy. I completed the research and presented this evidence to nursing leadership that eventually resulted in a change of practice and an updated protocol was initiated hospital wide for all oncology patients with a port-a-cath.

MEMBERSHIPS AND COMMITTEES

2018 – 2023	Society for Integrative Oncology (SIO)
2014 – 2018	American Society of Clinical Oncology (ASCO)
2003 – 2015	Oncology Nursing Society (ONS)
2012 – 2014	American Association of Nurse Practitioners (AANP)
2000 – 2003	National Student Nurse Association (NSNA) Delegate in Nashville, TN
2000 – 2002	Student Nurses Organization (SNO) at Ocean County College
2000 – 2002	Secretary for the Nursing Class of 2002 at Ocean County College

AWARDS AND SCHOLARSHIPS DURING SCHOOL

2007 – 2013	Sigma Theta Tau International Nursing Honor Society
2007/2008	Workforce Grant Scholarship through New York State for Healthcare Professionals
2002	Woman of the Moose Foundation Scholarship
